Hiring Manager

Zeraki

Dear Hiring Manager,

I am writing to express my interest in the Mid-Level Frontend Developer position at Zeraki. With over two years of hands-on experience in building high-performance web applications using Angular and React, combined with my passion for creating exceptional user experiences, I am excited about the opportunity to contribute to your innovative team.

In my current role as a Full-Stack Developer at Four Africa, I have led major server-side projects, enhancing app traffic by 25% and improving SEO. My experience includes developing scalable APIs, implementing efficient CI/CD pipelines, and optimizing application performance. I have a robust background in JavaScript, React.js (Next.js), Angular, and Node.js, and proficiency in HTML, CSS, and modern JavaScript. This has equipped me with a comprehensive skill set that aligns with the requirements outlined in your job description.

My work at Four Africa and my contributions to open-source projects have honed my ability to collaborate effectively with cross-functional teams. I have consistently delivered high-quality, maintainable code and have a strong track record of mentoring junior developers. My experience in integrating front-end and back-end systems and optimizing applications for speed and scalability further aligns with the responsibilities of the role at Zeraki.

I am highly self-motivated and thrive in both independent and team-oriented environments. My exceptional communication skills allow me to articulate complex ideas clearly, and my adaptability enables me to absorb new technologies and meet changing requirements quickly.

I am enthusiastic about the opportunity to bring my expertise and passion for front-end development to Zeraki. Thank you for considering my application. I look forward to discussing how my skills and experiences align with your team's goals.

Sincerely,

Jefferson Gakuya
