

Jefferson Gakuya

Software Engineer

Jefferson Gakuya • [Portfolio](#) • [GitHub](#)

Profile

Experienced software engineer with a passion for crafting exceptional user experiences. I have demonstrated expertise in front-end and back-end development, with a focus on full-stack solutions using JavaScript, React.js (Next.js), Vue.js, PHP, and serverless technologies. I am seeking a challenging role to leverage my diverse skillset and drive innovation in dynamic projects.

Work Experience

Full-Stack Developer

February 2022 – Present

Four Africa, Nairobi, Kenya

- I am leading a React Native Node.js application leveraging WooCommerce for custom endpoints. Responsible for optimizing and securing API endpoints to ensure robust performance and data protection.
- He led the development of a major server-side project, enhancing scalability and increasing app traffic by 25%, while significantly improving SEO using Next.js, React.js, and Node.js.
- Designed and implemented scalable APIs, handling everything from system requirements analysis to load balancing, software implementation, testing, and performance monitoring.
- Integrated Continuous Integration/Continuous Deployment (CI/CD) pipelines, conducted code reviews, and performed unit and stress testing to maintain high-quality code.
- Developed and customized WordPress plugins in PHP, enhancing website functionality to meet client requirements.
- Executed efficient SQL queries for data retrieval and integration from multiple databases.
- Designed and built responsive WordPress websites using HTML, CSS, and JavaScript, ensuring a seamless cross-device user experience.
- Maintained and deployed serverless applications using Next.js and React.js, with version control and hosting on Vercel.
- Created and implemented AWS Lambda functions to enhance application performance and scalability.

Backend Developer Intern

November 2021 – February 2022

Whip Music Africa, Lagos, Nigeria

- Played a key role as the first hire on the backend team of a funded startup, contributing to product strategy development as the team expanded to 20 members.
- Designed and implemented scalable API endpoints using Django Rest Framework and MySQL, optimizing API performance and response times.
- Reduced API bundle size and improved caching by 5%, resulting in faster data fetching and processing.

Computer Technician Assistant

December 2018 – April 2019

Antioch Baptist Computer Labs, Nairobi, Kenya

- Connected computers to networks and peripheral devices, including printers and scanners.
- Diagnosed and resolved user issues using test scripts, expertise, and probing questions.
- Installed and tested motherboards, processors, and graphics cards on desktops and laptops.

Education

Moringa School, Nairobi, Kenya

Diploma of Engineering — Computer Science

Nairobites Trust, Nairobi, Kenya

Diploma in Web Design and Web Development

Google Africa Developer Scholarship

Certificate, Technical Support Fundamentals

Skills

Languages & Frameworks: JavaScript (React.js, Next.js, Node.js, Express), Python (Django, Flask), PHP (WordPress), HTML5, CSS3

Databases: MongoDB, PostgreSQL, MySQL

Version Control: Git

Other: TypeScript, Redux, Mobx, Framer Motion, TailwindCSS, AWS Lambda, Vercel Functions
